## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "display image generation means ... for adding or attaching preservation location data *in the storage means of the high resolution image ...*" (italics added) at lines 11-15 of base claim 1 is unclear. The recitation seems to imply that the high resolution image has a storage means, which would not make sense since the high resolution image is just an image on a sheet of paper or on a display. Perhaps applicant is referring to the high resolution image storage unit for storing the high resolution image (lines 9-10), which also stores the preservation location data (line 13), but this is not clear from the claim.

### ***Allowable Subject Matter***

3. Claims 1-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. The following is a statement of reasons for the indication of allowable subject matter: No prior art has been found to teach or suggest applicant's combination of output request means, preservation location data reading unit and transfer request/receiving unit, as recited in base claim 1.
